

TOTAL TRUCK CARE

TOTAL TRUCK CARE

Your trucks are your fleet's livelihood, which makes keeping up with routine maintenance one of the most important things on the road. Routine maintenance is what keeps your trucks running and your cash flow going. That is why Love's offers a nationwide network of total truck care centers so the needs of your fleet are met no matter where your trucks are. The combination of Speedco and Love's Truck Tire Care means we can offer more truck services than ever. We've expanded our truck tire selection, light mechanical services and emergency roadside assistance to better serve our customers.

THE MOST TRUSTED NAME IN TIRES

As your source for the most trusted name in tires, Speedco and Love's Truck Tire Care centers carry an extensive selection of tires to fit every national account program, including Michelin, Bridgestone, Goodyear, Continental and Yokohama.

24/7 ROADSIDE ASSISTANCE

Each Love's Truck Tire Care center is furnished with state-of-the-art trucks and equipment, with a full compliment of roadside tools to ensure the fastest possible response to drivers in the middle of nowhere - 24 hours a day.

RETREAD TIRES

A NAME YOU ALREADY KNOW AND TRUST

Love's and Speedco locations now offer a comprehensive retread product portfolio of high performance tread designs featuring application specific compounds and patented technologies, including SmartWay® verified products, to meet all of your fleet needs.

BEST RETREAD WARRANTY IN THE INDUSTRY

The Love's retread warranty combines quality and safety and is designed with your fleet's efficiency in mind. Our warranty is simple: we warrant the retread and casing for the full life of the retread. Repairs are warranted for the life of casing when returned to Love's for retreading. The warranty begins at the inspection process. Not all casings qualify for our fleet retread program. We offer a comprehensive warranty like this because of our commitment to quality in using the best casing from the start.

THE MOST INSPECTED RETREAD ON THE ROAD

We are here to change the mindset about retreads and their reliability. So much so, we are the only retread manufacturer that completes every inspection step available in the retreading process.

Utilizing the latest innovative technology in the industry, our five-step process utilizes visual light, electronic liner, laser shearography, x-ray and pressure casing analysis.

Our rigorous inspection and quality assurance processes provide your fleet with a reliable and consistent product that ultimately reduces your total cost per mile.

Our mission is to provide your fleet with a tire program to meet your needs. Now, with a broad selection of application specific and SmartWay® verified retreads available through a nationwide network, you can rely on us, every mile of the way.

RETREAD INSPECTION PROCESS

QUALITY RETREADS / STEP-BY-STEP

We are here to change the mindset about retreads and their reliability. So much so, we are the only retread manufacturer that completes every inspection step available in the retreading process.

Utilizing the latest innovative technology in the industry, our five-step process utilizes visual light, electronic liner, laser shearography, x-ray and pressure casing analysis.

Our rigorous inspection and quality assurance processes provide your fleet with a reliable and consistent product that ultimately reduces your total cost per mile.

1 INITIAL INSPECTION

- Used tires arrive at our facility for inspection
- All casings are barcoded to be tracked during retreading
- Light and electronic liner inspections expose any internal issues
- Tires outside of defined repairable conditions of casing specifications are eliminated

2 BUFFING, X-RAY & SHEAROGRAPHY

- Buffing is computer controlled by customized profiles for each brand
- A measuring device controls the depth of undertread to ensure a cool running tire
- Casings are analyzed with laser shearography to detect belt separations
- X-ray inspection is used to verify any suspected sidewall or bead damage

3 PATCH & REPAIR

- Damages are fully identified and repaired
- All repairs utilize a thermal cure repair technique for optimum results
- Every Love's casing repair is guaranteed for the life of the casing

4 TREADING

- Heated cushion gum fills skives and buzz-outs while preparing casing for new tread
- Tread selection is based upon customer's specifications and application
- All retreads are enveloped, vacuum tested and cured in a computer controlled chamber

5 FINAL INSPECTION

- Inspecting hot casings after curing allows any anomalies to be detected
- A three-step pressure testing cycle ensures the integrity of the finished tire
- Our retreads are available at any Loves Truck Tire Care or Speedco location or for direct delivery to your fleet terminal location
